

cargofleet Van

The optimal solution for vans and distribution transport

- » Precise positioning, vehicle data and order management
- » Quality assurance and process optimisation
- » Technical and economic analysis
- » Legally compliant documentation

Rapid and complete delivery

Gain valuable time. No matter if you're working as driver or dispatcher, in hectic express delivery or transportation of sensitive fresh products, it is always important to have the necessary information at hand. With the fleet management solution cargofleet – especially designed for distribution traffic or the transport of temperature-controlled goods – you, your driver or subcontractors receive the support required.

With cargofleet you have all your deliveries safely in view:

- » Vehicle location
- » Immediate and legally-compliant proof of uninterrupted cold chain
- » Integrated navigation for optimized route selection
- » Transmission of all delivery data incl. date/time and location stamp
- » Driving style analysis via variable criteria

Profit from cargofleet Van

EFFICIENCY

- » Efficient use of vehicles and fleet management
- » Efficient driver assistance
- » Control of orders and cold chain at all time
- » Reduction in the displacement of empty vehicles and vehicle standstill periods
- » Optimized transport and settlement process
- » Order transmission and processing
- » Less consumption, less wear
- » Uninterrupted operation

QUALITY

- » Increased customer satisfaction
- » Increased vehicles utilisation
- » Automatic recording of temperature data curve
- » Easy integration of your subcontractors
- » Continuous digital information chain
- » Objective data acquisition and data consistency
- » Error avoidance in order processing

DOCUMENTATION

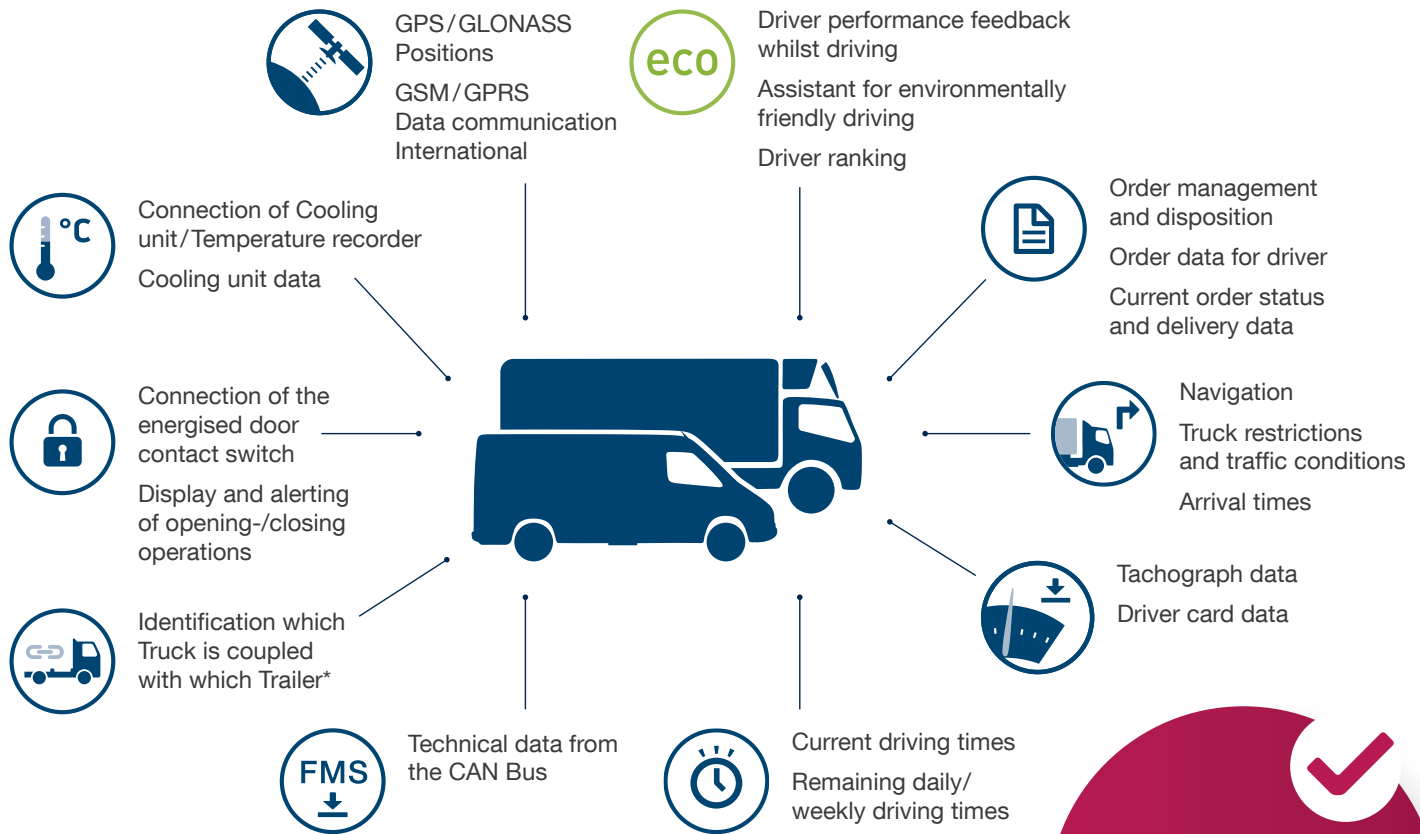

- » Performing and cooling data collection
- » Recording of working hours and expenses, in cooperation with partners
- » Information on driving time and rest periods
- » Routes and consumptions costs
- » Continuous driving style analysis and improvement

REDUCES COSTS

- » Reduced workload through automatic recording and documentation of the tour itinerary
- » Use optimisation of the fleet
- » Avoidance in the displacement of empty vehicles
- » TempRecorder saves separate data logger

There are partnerships and interfaces to leading logistics and ERP software solutions. The coupling to the systems is done via a simple to set up web-based method.

*requires the use of the TC Truck and TC Trailer Gateway/TControl terminals
